## Resham Sutra - Impact Assessment findings

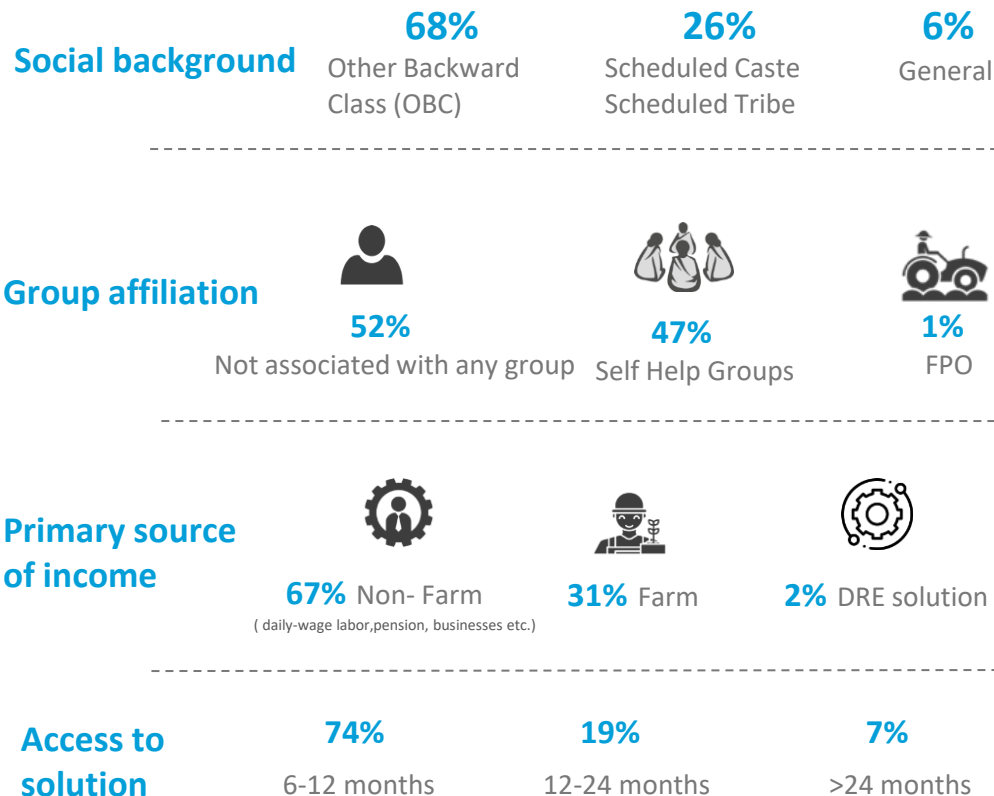

**Who are the users of the  
silk reeling machine?**

# Overall end-user demographics (N=277)

4 154

Note - Legibility of smaller regions might be restricted due to browser-based no/low-code tools

# Electricity scenario among respondents (N=277)

Grid electricity availability at the place  
of DRE solution usage

93%

7%

---

Continuous power supply

4.7 hours

Total power outage

2 hours

Frequency of power cuts

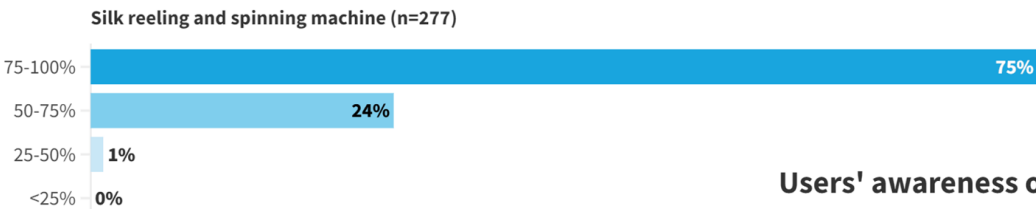

3 - 4 times

*Reported by 43% users having  
Grid electricity access*

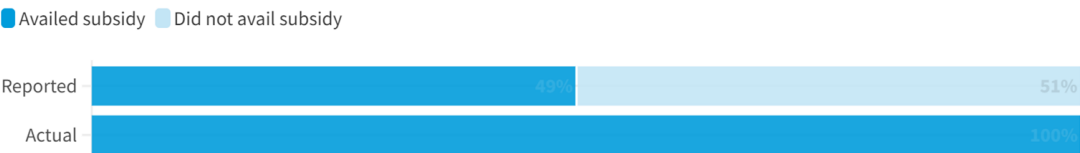

\*Between 8 AM - 6 PM on a typical day

# Users mostly rely on subsidies for procuring the silk reeling machine

## Share of respondents availing varying extent of subsidy

## Users' awareness on the unit cost remains low (n=119)

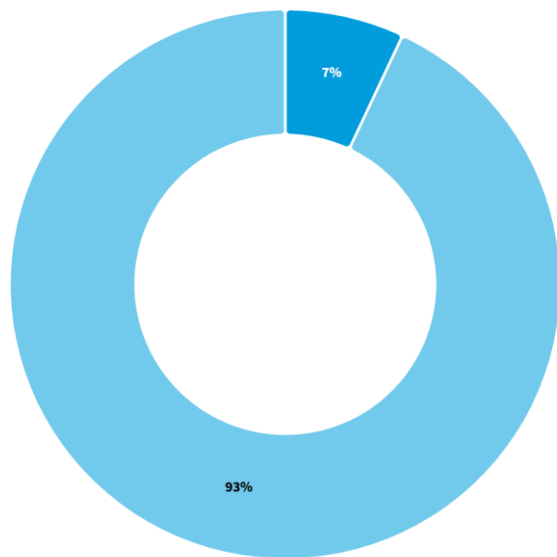

- A solution has been considered to be **subsidised if the user contribution is less than 60%** of the unit cost of the solution.
- Users who did not buy the solution, i.e. contribute upfront towards the cost of the solution have been considered to have availed 100% subsidy on the unit cost.
- Users who responded with others as their purchase mode, where user contribution data was not available, the remaining cost was considered to be subsidised.

## Adoption of Silk reeling machine by availing loan remains low

Share of users reporting availing a loan (n=119)

■ Availed loan ■ Did not avail loan

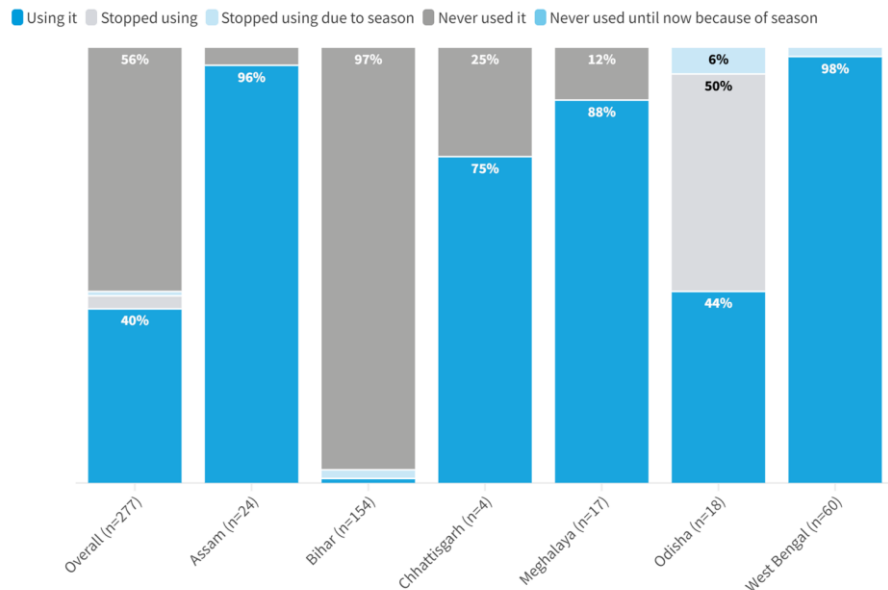

- Users availing loan are largely from Meghalaya and Assam states.
- Top reason for availing loan cited are - No collateral required (56%), easy loan process (33%), low or no interest rate (11%)
- Loan source are found to be disbursed by banks for these users.

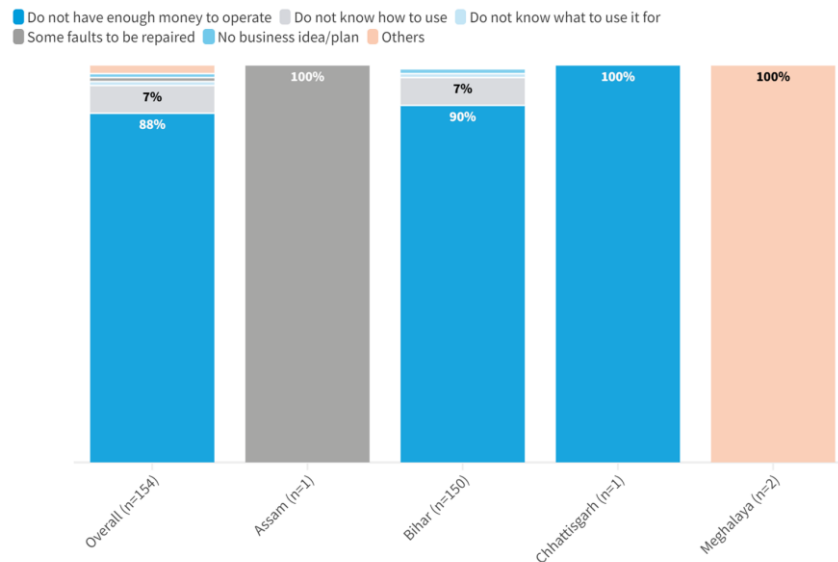

**How are users using the silk reeling machine?**

# Only about 40% users reported using the solution at the time of survey

## Usage of the silk reeling machine across states (n=277)

## Reasons for non-usage of the silk reeling machine (n=154)

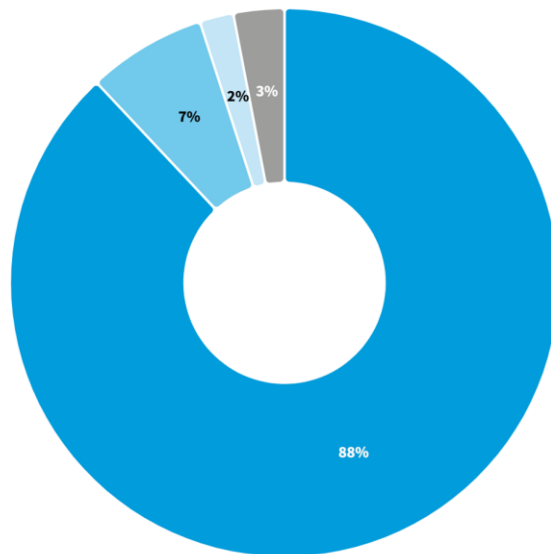

**10** Number of months of reported usage per year (Median value)

**5** Number of hours of reported usage per day (Median value)

## About 88% users reported using the solution at the time of survey

Usage of the silk reeling machine at the time of survey (n=123)

■ Using it ■ Stopped using ■ Stopped using due to season ■ Never used it

**10** Number of months of reported usage per year (*Median value*)

**5** Number of hours of reported usage per day (*Median value*)

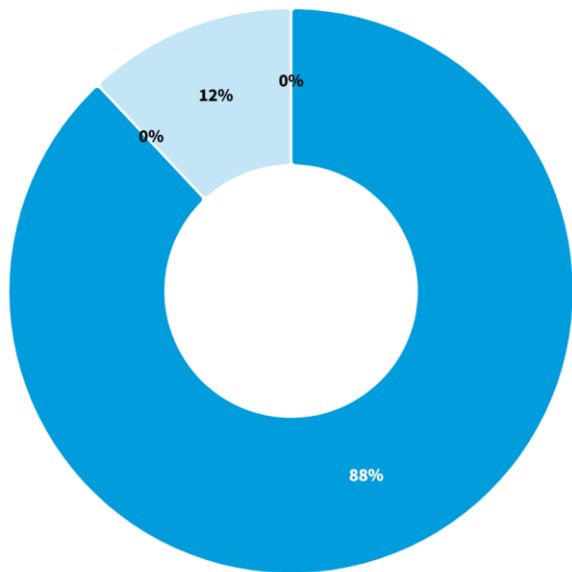

Source: Emotive Lens/CEEW

**How much did the income  
of the end-users change?**

# About 88% users report an increase in income post the usage of silk reeling machine

Has your income changed after the use of silk reeling machine? (n=106)

■ Yes, increased ■ Yes, decreased ■ No change ■ I don't know

■ Change in income (INR)

Overall (n=106)

38,300

Male (n=9)

58,000

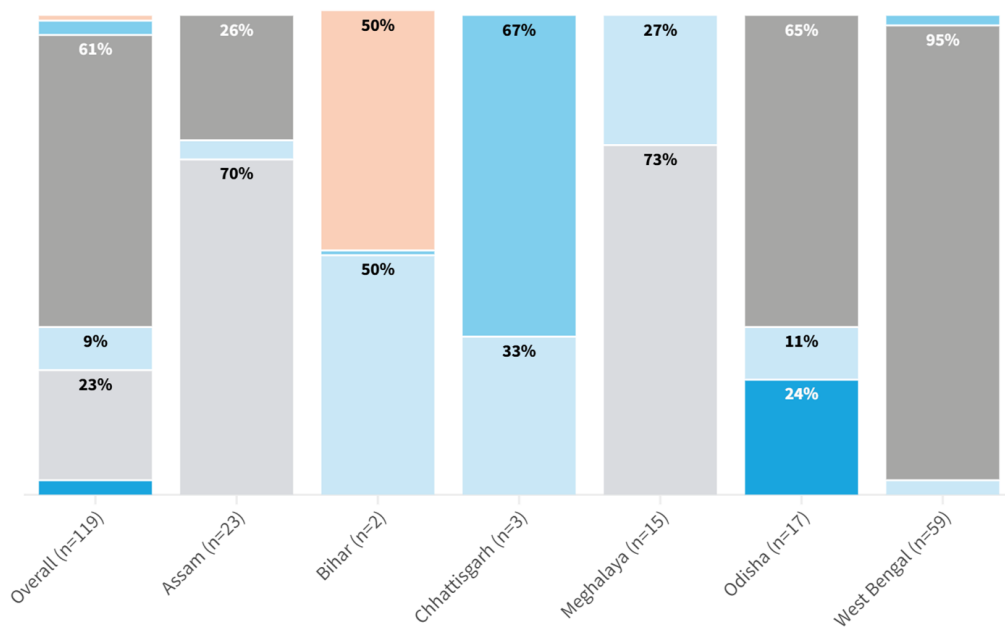

Female (n=97)

36,450

# Significant variation in source for raw material across states

## Source of raw material (n=119)

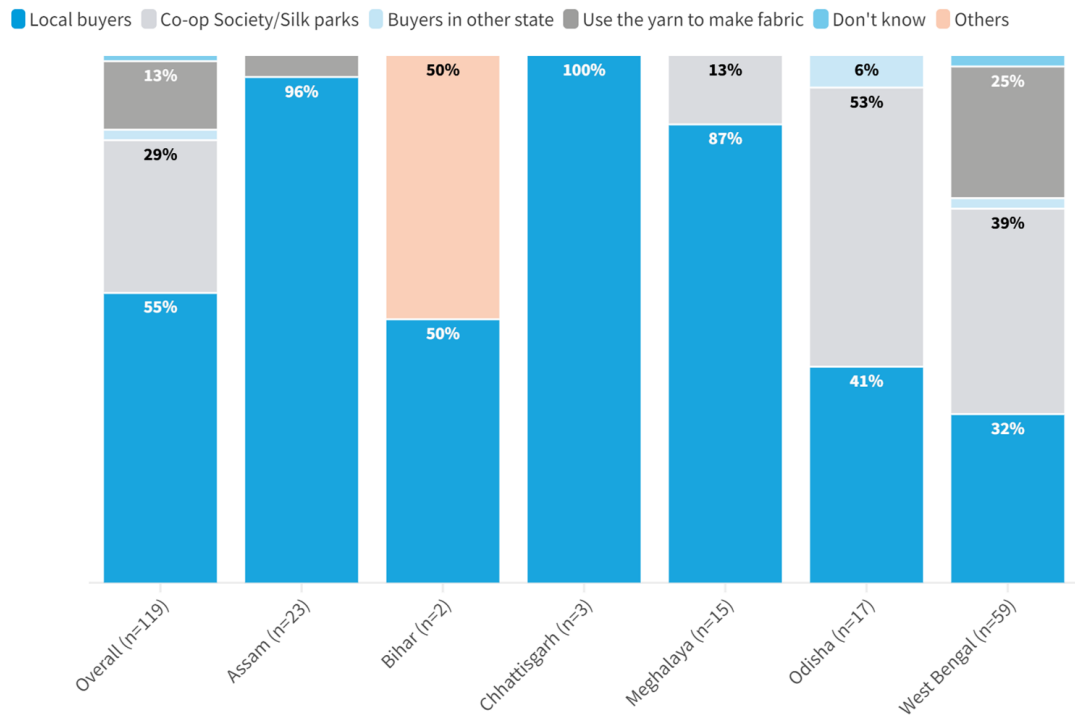

Govt institution On own farm Middlemen Private registered seller SHG Others

- Majority of users from Assam & Meghalaya users cite their own farm as source for procuring cocoons.
- While users from Odisha & West Bengal procure it from Private registered sellers.
- Users from CG however rely on SHG for their supply of cocoons.

# Majority users sell the reeled silk to local buyers

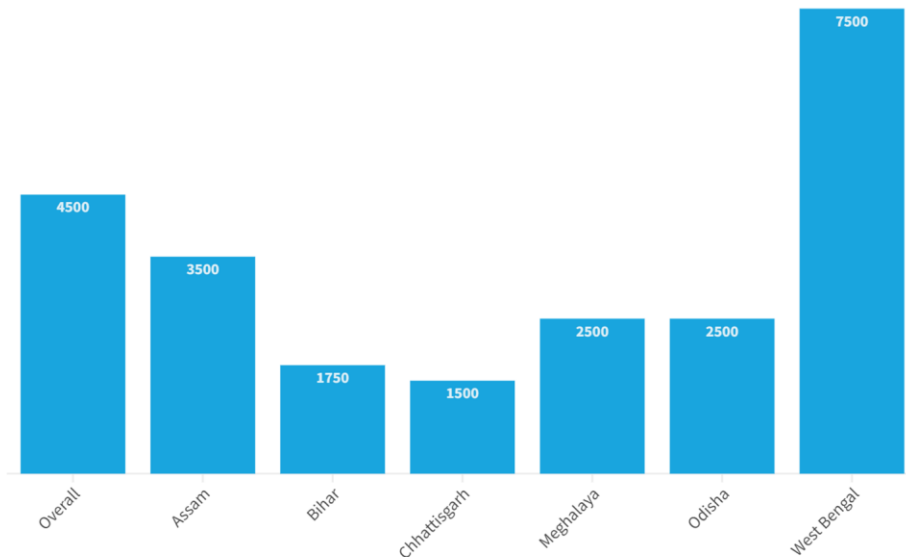

## Marketplace for selling yarn (n=119)

# Selling Price v Income from product

Reported selling price (median) of yarn

■ Median Price (INR)

Reported income from the product

■ Median Value (INR)
