About This Report

This report is designed to provide you with an in-depth understanding of your spinners, their profile, the outcomes they experience, how satisfied they are, and how you can improve your impact and business performance.

The insights are based on phone interviews with 201 spinners in India. Out of these, 103 spinners either solely purchased Resham Sutra's spinning machine or accessed both the machine and training, while the remaining 98 spinners only accessed training. These interviews were conducted by 60 Decibels trained researchers. We really enjoyed hearing from your spinners – they had a lot to say!

We employed a random sampling method to select respondents. To learn more about our methodology, head to the [Appendix](#).

To contextualize your results, you can see how your performance compares to other companies in the Quality Jobs sector in the [Performance Snapshot](#) and [Appendix](#).

We encourage you to use these results to set targets and identify ways you can further improve your impact performance over time.

201 spinners interviewed,
103 directly purchased a machine, 98 only
accessed training

“

Resham Sutra's machine is now easy to use. I can earn more than I used to. There is potential to move forward, and it also motivates me to continue this work.

Spinner, directly bought machine,
40

60dB Perspective

Top Insights

1 Resham Sutra is providing a unique product and service to silk spinners in India.

Half of the spinners we spoke to accessed only the training, while the rest accessed both the training and the spinning machine. Resham Sutra's spinners have an Inclusivity Ratio (IR) of 0.84, indicating a slightly poorer base than India's population.

While the majority of those who accessed the machines directly bought them from Resham Sutra, nearly 8 in 10 say they are accessing it for the first time. When asked about their motivation to purchase the machine, they talk about the ease of use, good training, and increased production of silk. This indicates that Resham Sutra is reaching an underserved base of female spinners in North-East India.

See pages: [7](#), [8](#), [9](#).

3 Spinners are seeing an increase in their silk production because of Resham Sutra.

Before using Resham Sutra's spinning machine, the majority of spinners produced less than 500 grams of silk. However, after using Resham Sutra's spinning machine, about 3 in 5 now produce more than 500 grams of silk every week. Nearly 4 in 5 spinners report an increase in their earnings, primarily because of improved yarn quality and technical skills, and increased productivity. This suggests that Resham Sutra is enabling spinners to scale their production significantly, unlocking new income potential and contributing to their economic stability.

See page: [12](#), [13](#).

5 Affordability concerns prevent prospective spinners from purchasing Resham Sutra machines, limiting its impact potential.

Almost all spinners report receiving some form of training from Resham Sutra, with a majority receiving training on technical skills. However, half of the spinners report not purchasing the machine after training, primarily due to financial constraints.

As affordability remains a significant barrier preventing spinners from buying the machine, exploring more flexible financing options can potentially improve accessibility for these spinners.

See page: [18](#).

2 Impact on spinners' life is high, and appears to be translating into quality of life improvements.

Nearly all spinners report that their confidence in their abilities has improved because of Resham Sutra. Additionally, three-quarters say their ability to make independent financial decisions has improved.

More than 4 in 5 spinners say their quality of life has improved because of Resham Sutra, with 24% reporting significant improvements. They mainly cite increased income, greater affordability of household bills and financial independence. Resham Sutra is contributing to spinners' sense of agency and confidence, helping them take control of their financial future and enhancing their overall quality of life.

See pages: [10](#), [11](#).

4 While spinners are satisfied with Resham Sutra, there is room to reduce the challenge rate.

Resham Sutra has an NPS of 58, which is very good. Promoters value increased production, higher quality output and increased income while Passives and Detractors both want more training and support. However, a third of the spinners report facing challenges and mainly citing machine malfunctions, poor output quality, and poor customer service. These clients have a significantly lower NPS than those who do not experience challenges (31 vs 72). Improving machine performance or providing more proactive customer service can help enhance spinner experience and overall satisfaction.

See page: [15](#), [16](#), [17](#).

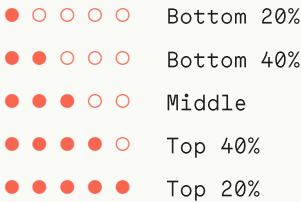

Performance Snapshot

The performance column presents how you compare to 60 Decibels Benchmarks in the Quality Jobs sector globally. You can find additional insights of your results, in the context of the 60 Decibels Benchmarks, in the [Appendix](#).

*Throughout the report, we have included benchmarks at the Global Quality Jobs level to provide meaningful comparisons of your results at the sector level.

**For further details, we have included benchmarks at the national level for India on this page, covering a range of sectors such as agriculture, financial inclusion, energy, and more. At this time, we do not have sufficient data to assess the Quality Jobs sector at the India level. However, the benchmarks provided here offer valuable comparisons at the geographical level.

01: Profile

This section helps you understand your customer base, and if you are reaching a previously underserved population.

The key indicators in this section are:

- **Inclusivity Ratio:** Are you reaching less well-off spinners? How representative is your customer base of the national population of India?
- **First Access:** What proportion of your spinners are accessing a similar product or service for the first time?
- **Resources Accessed:** What resources are spinners accessing from Resham Sutra? What was their motivation to use the spinning machine?

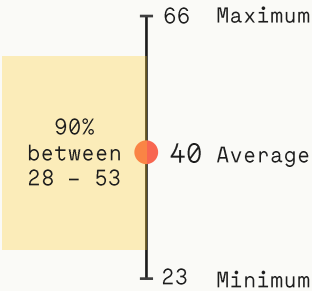

Profile

A typical Resham Sutra spinner is a 40-year-old female from Assam, living in a household of 6 and using the machine for 1 year.

Demographics (n = 103)

State	
Assam	68%
Meghalaya	30%
Nagaland	2%
Duration of Usage	
Less than 1 year	70%
1 – 2 years	26%
3 years or more	4%

Age Distribution

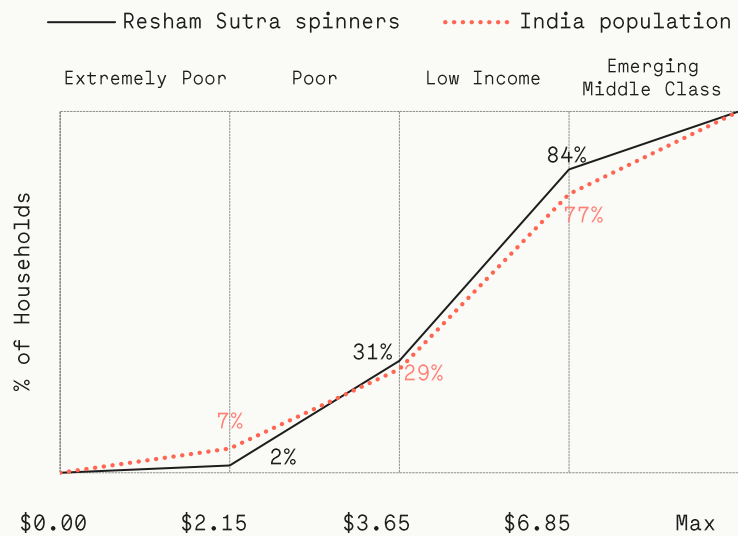

Household Size
6 People

Spinners are slightly poorer than India’s population. 31% fall under the \$3.65 line, compared to 29% nationally.

Spinners’ Income Distribution Relative to India Average

% living below \$x.xx per person per day (2017 PPP) (n = 190*)

Inclusivity Ratio

Degree to which Resham Sutra is reaching low-income clients in India (n = 190*)

0.84

1 = parity with population;
> 1 = over-serving;
< 1 = under-serving.
See Appendix for calculation.

●●●●○
TOP 40% - 60dB Benchmark

Inclusivity Ratio	
Accessed machine and training (n = 102)	0.73
Accessed only training (n = 88)	0.96

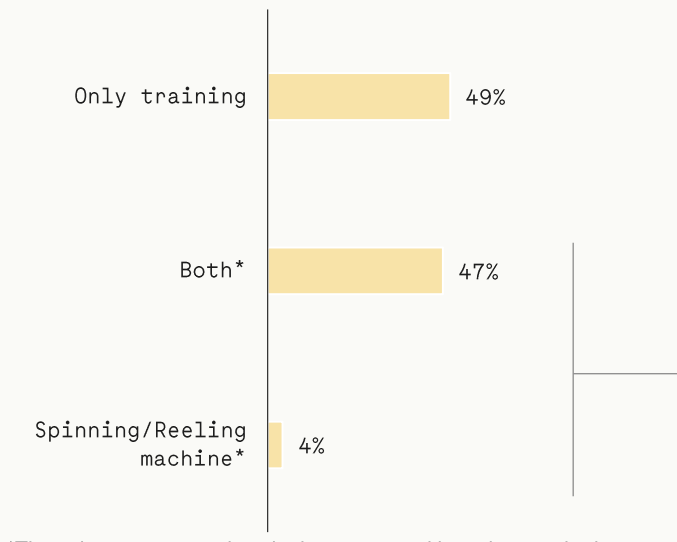

*The sample size is reflective of spinners who answered all questions in the Poverty Probability module. 10 spinners who accessed only 'training' did not answer these questions.

Profile

Half the spinners accessed only training from Resham Sutra, while the rest accessed both the machine and training.

Services Accessed

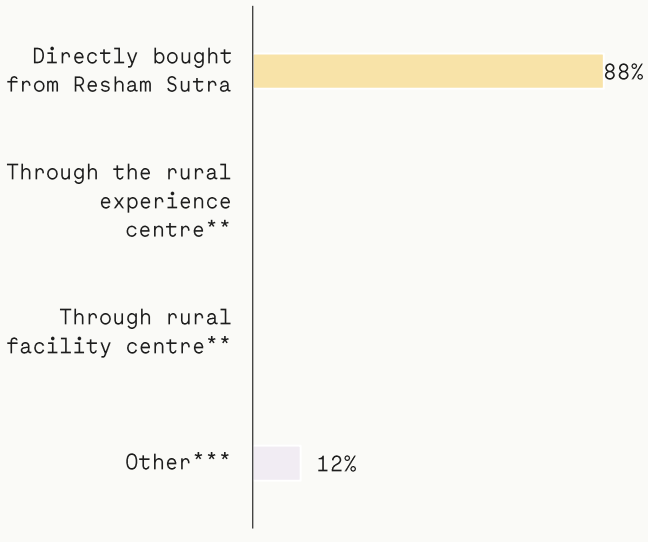

Q: What resources or services are you using Resham Sutra for? (n = 201)

*The subsequent questions in the survey tool have been asked to 103 spinners who selected either 'Both' or 'Spinning/ reeling machine' in this question. A few questions have been asked to spinners who only accessed training from Resham Sutra.

Way of Accessing the Spinning Machine

Q: How do you access Resham Sutra's spinning machine? (n = 103)

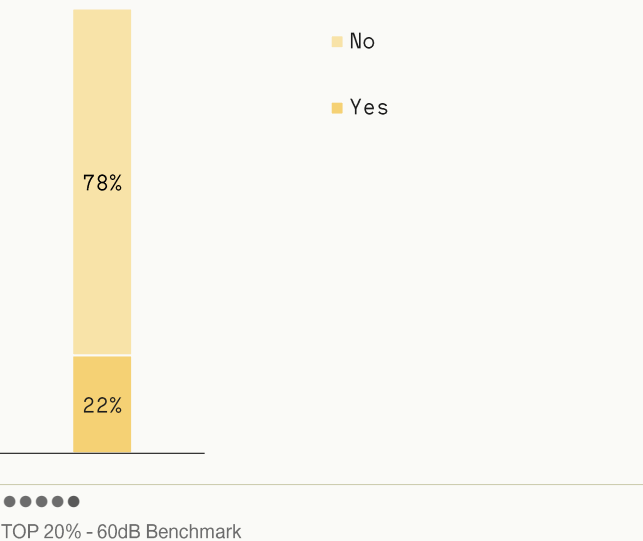

*Spinners who are using Resham Sutra's machine through the rural experience/facility centre are not part of our sample, as we did not receive their contact database.
**Others include Selco Foundation, Sanjog, and Sreshtha.

78% of the spinners had no prior access to a similar machine, and are primarily motivated to purchase it because of ease of use.

First Access

Q: Before Resham Sutra, did you have access to a spinning machine like Resham Sutra provides? (n = 103)

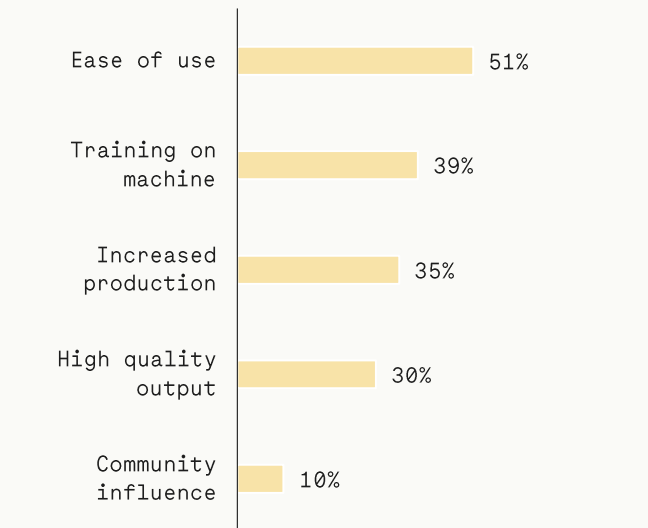

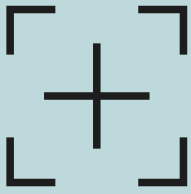

TOP 20% - 60dB Benchmark

60 — decibels

Motivation to Use Resham Sutra Machine

Q: What motivated you to [purchase / use] Resham Sutra's spinning machine? (n = 103). Open-ended. Coded by 60 Decibels.

02: Impact

We believe that the best way to understand the social impact that you are having is to simply ask spinners whether their quality of life and income has changed as a result of access to the Resham Sutra, and if so, how.

This section shows you the degree to which you are impacting quality of life, and what outcomes, if any, spinners are experiencing, in their own words.

The key indicators in this section are:

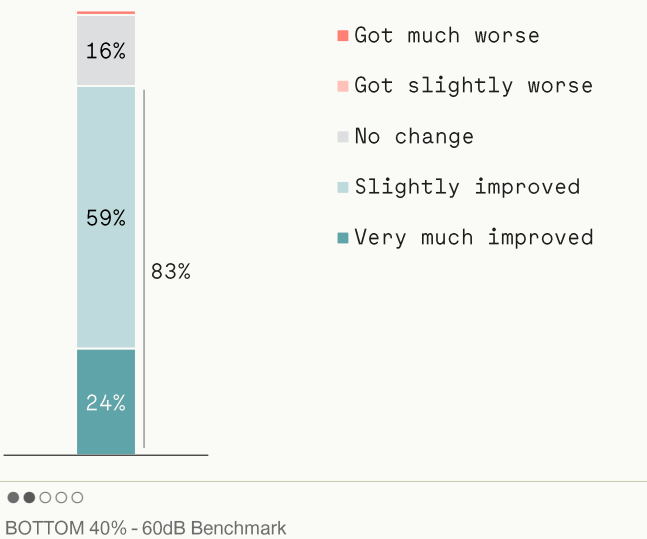

- **Quality of Life:** To what extent has the quality of life of your spinners changed as a result of your offering?
- **Silk Production:** How much silk did spinners produce before Resham Sutra, and how did it change after using their machine?
- **Money Earned:** Did spinners see a change in the money they earn because of using Resham Sutra's spinning machine? What were the reasons for the increase?

[+] Impact

83% of the spinners say their quality of life has improved because of Resham Sutra, with 24% reporting significant improvements.

Change in Quality of Life

Q: Has your quality of life changed because of a Resham Sutra? (n = 103)

Top quality of life improvements include increased income, ability to afford household bills, and improved financial independence.

Open-ended question, responses coded by 60dB

65%
talk about increased income
(53% of all spinners who purchased machine)

44%
mention affording household bills
(36% of all spinners who purchased machine)

34%
report improved financial independence
(28% of all spinners who purchased machine)

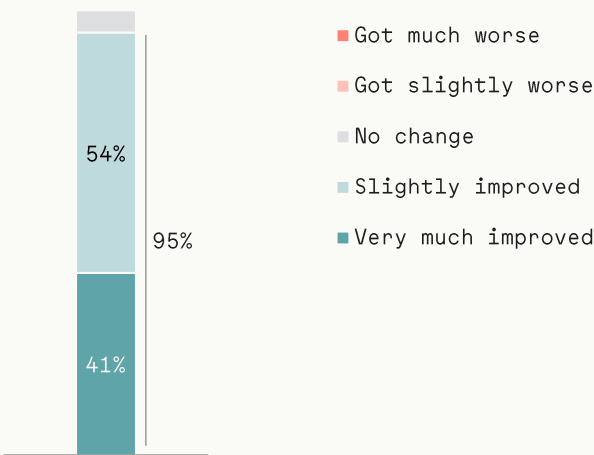

“
I have become self-reliant and now help others to become self-reliant. My earnings have improved, improving my quality of life as well.
Spinner, directly bought machine, 43

[+] Impact

95% of the spinners say that their confidence in themselves and their abilities has improved because of Resham Sutra.

Change in Confidence Level

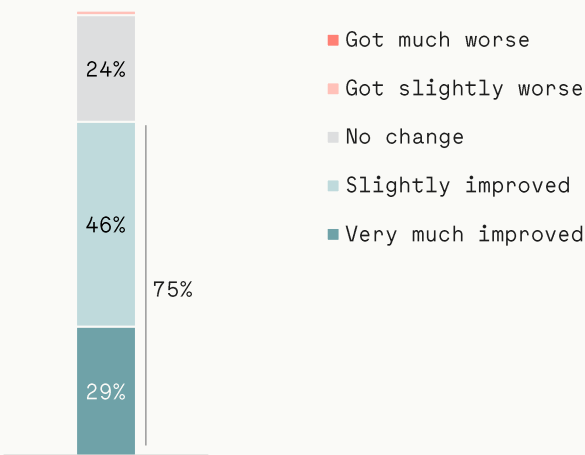

Q: Has your confidence in yourself and your abilities changed because of Resham Sutra? Has it: (n = 103)

75% of the spinners say that their ability to independently make financial decisions has improved because of Resham Sutra.

Change in Independent Financial Decision Making

Q: Has your ability to make decisions on what you do with your money (i.e. spend or save) without consulting your spouse/another adult changed because of Resham Sutra? (n = 103).

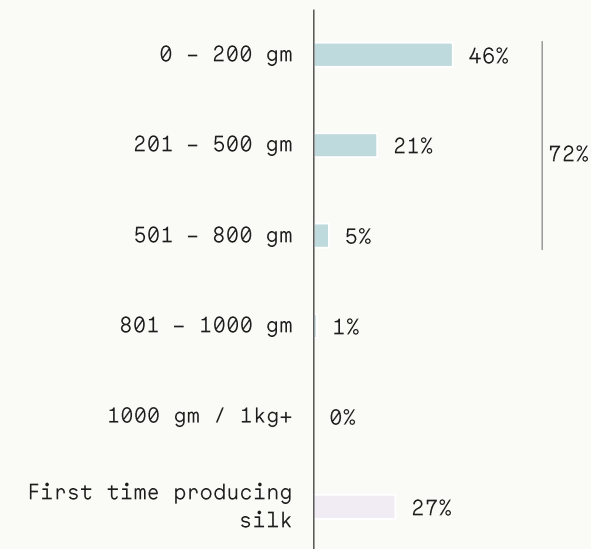

“Mothers who are housewives are gaining income, and self-confidence. My relatives who had dropped out of school have become skilled and self-employed with the help of the training and the machine.
Spinner, directly bought machine, 37

[+] Impact

Before Resham Sutra, 72% of spinners produced under 500gms of silk; after using it, 56% now produce over 500gms.

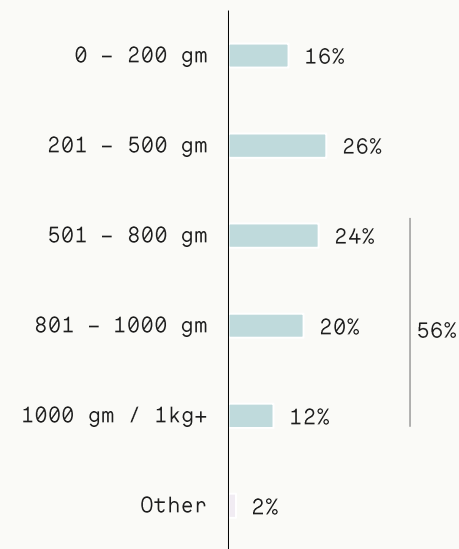

Silk Produced Prior to Resham Sutra

Q: Prior to using Resham Sutra’s spinning machine, how much silk yarn, on average, did you produce per week? (n = 103)

Silk Produced After Resham Sutra

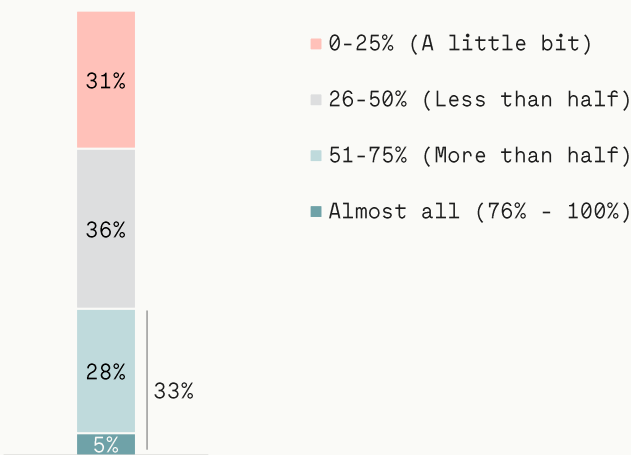

Q: After using Resham Sutra’s spinning machine, on average, how much silk yarn, do you produce per week? (n = 101)

33% of the spinners say that more than 50% of their total personal income came from spinning silk in the last 12 months,

Proportion of Personal Income from Spinning

Q: In the last 12 months, what proportion of your total personal income came from silk spinning/ reeling? (n = 78)*.

*24% (25 spinners) of the sample reported ‘don’t know / can’t say’.

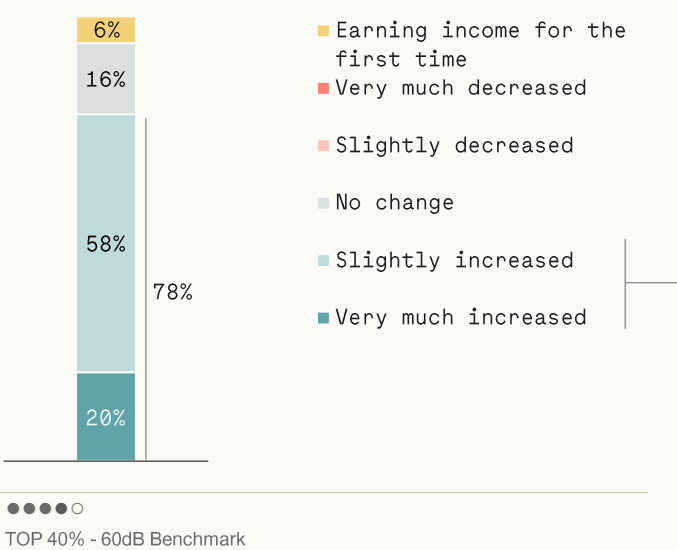

“ Ever since I started using this machine, I have been able to make more thread than before. The money I earn from selling the thread is used to manage household expenses. Spinner, directly bought machine, 34

[+] Impact

78% of the spinners report increased income due to better yarn quality and technical training from Resham Sutra.

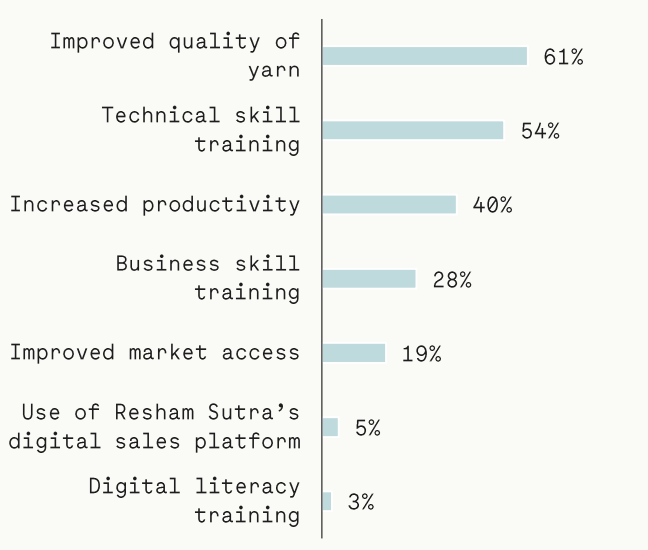

Change in Money Earned

Q: Has the money you earn (your income) changed because of Resham Sutra? (n = 103)

Reason for Increase in Money Earned

Q: Which of the following factors have contributed to increase in your income? (n = 81).

“The Resham Sutra's spinning machine helps in expanding the business by increasing silk production, so I have recommended it to my neighbors. Spinner, directly bought machine, 53

03: Experience

If your spinners are unhappy, it's unlikely they will continue to choose your spinning machine or recommend to others.

This section uses the popular Net Promoter Score® to understand the level and drivers of customer satisfaction and loyalty. Additional insights on challenges and suggestions for improvement highlight areas you can improve.

The key indicators in this section are:

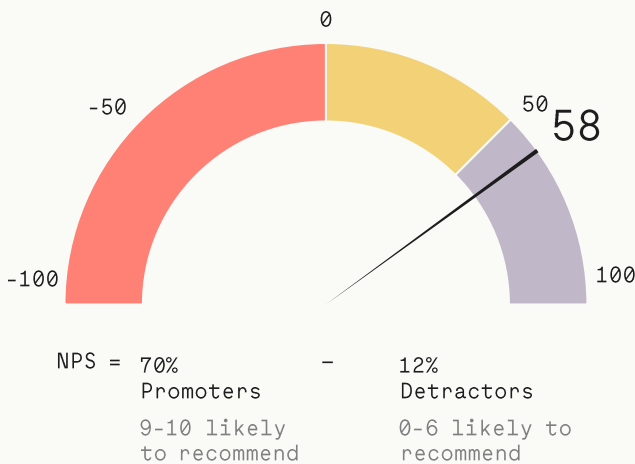

- **Net Promoter Score:** How likely are your spinners to recommend your company to a friend?
- **Challenges:** What proportion of spinners experience challenges with your spinning machine?
- **Training:** What kind of training did spinners receive from Resham Sutra? Did training influence their decision to purchase the machine?

Experience

70% of the spinner are Promoters, and Resham Sutra has an NPS of 58, which is very good and higher than the 60dB Benchmark.

Net Promoter Score® (NPS)

Q: On a scale of 0-10, how likely are you to recommend Resham Sutra to a friend or family member, where 0 is not at all likely and 10 is extremely likely? (n = 103)

The Net Promoter Score® (NPS) is a gauge of respondent satisfaction and loyalty. The NPS is the percent of spinners rating 9 or 10 ('Promoters') minus the percent of spinners rating 0 to 6 ('Detractors'). Those rating 7 or 8 are 'Passives'.

The score can range from -100 to 100. Resham Sutra in India has a NPS of 58, which is very good!

Insight

Spinners aged 40 years or below are more satisfied (NPS of 67) than those aged more than 40 years (NPS of 48). Focusing on providing more training and support can help boost overall satisfaction among the older spinners.

●●●●○
TOP 40% - 60dB Benchmark

Promoters value increased production and high-quality outputs. Passives and Detractors seek more training and support.

Follow up from NPS question: We ask spinners to explain their rating to provide an insight into what they value and what creates dissatisfaction.

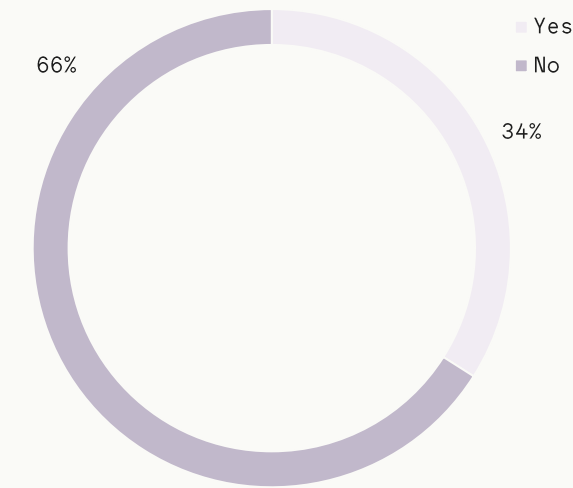

70% 😊 are Promoters They love: 1. Increased production (49% of Promoters / 18% of all spinners who purchased machine) 2. Higher quality output (37% of Promoters / 13% of all spinners who purchased machine) 3. Increased income (31% of Promoters / 11% of all spinners who purchased machine)	18% 😐 are Passives They like: 1. Increased production (63% of Passives / 12 spinners) They want to see: 2. More training and support (2 spinners) 3. Flexible payment options (2 spinners)	12% ☹️ are Detractors They want to see: 1. More training and support (5 spinners) 2. Lower costs (5 spinners)
---	--	--

Experience

34% of the spinners report facing challenges with Resham Sutra’s spinning machine.

Proportion of Spinners Reporting Challenges

Q: Have you experienced any challenges with using Resham Sutra’s spinning machine? (n = 103)

Insight

Spinners that report facing challenges with Resham Sutra have a significantly lower NPS than those who do not face any challenge (31 vs 72).

Exploring the specific challenges experienced by this group can help identify their pain points and inform targeted actions to address them.

MIDDLE 60dB - Benchmark

Of those who experience a challenge, the most common ones are related to machine malfunctions and poor-quality output.

Most Common Challenges

Q: Please explain these challenges. (n = 35).
Open-ended, coded by 60 Decibels.

20
spinners
talk about machine
malfunctions

11
spinners
mention poor
quality output

8
spinners
report poor
customer service

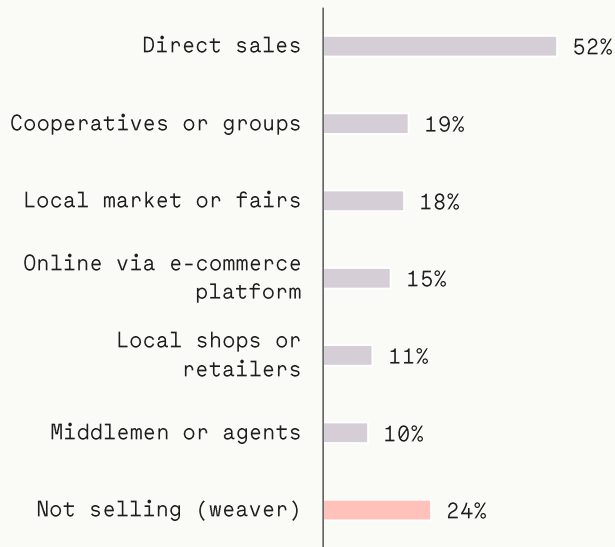

“
From the time I received the machine, I could not use it as it did not work. I have reported it to the company, and they said to call again if it doesn’t work. I called again, but I have not received it yet.
Spinner, directly bought machine, 36

🏡 Experience

Spinners typically sell their silk through direct sales, cooperatives or local markets. 24% use it to weave their own cloth.

Silk Sale Method

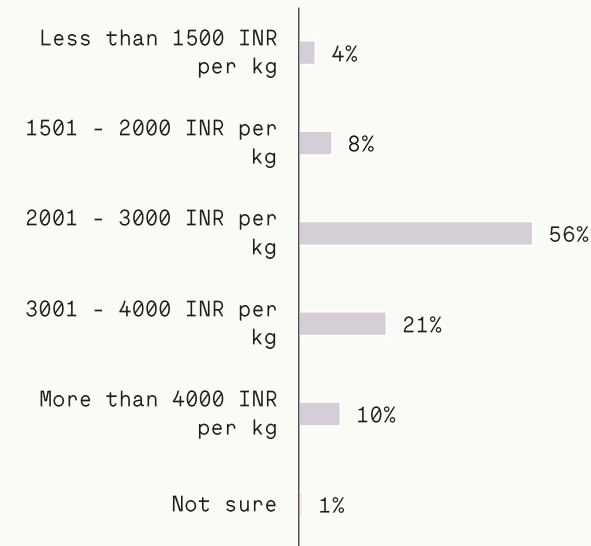

Q: How do you typically sell the silk you produce using Resham Sutra's spinning machine? (n = 103)

56% of the spinners sell their silk for 2,000 to 3,000 INR per kg, and nearly all find it easier to sell since working with Resham Sutra.

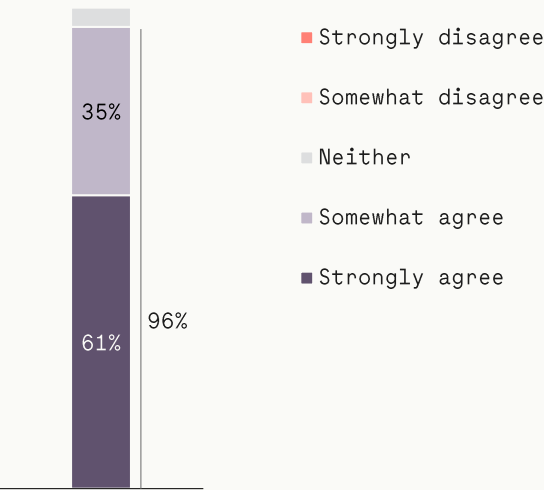

Silk Selling Price

Q: At what price do you typically sell the silk you produce using Resham Sutra's spinning machine? (n = 78*)

Ease of Selling Silk

Q: To what extent do you agree or disagree with this statement? Since working with Resham Sutra, it is easier to sell my silk products. (n = 78*)

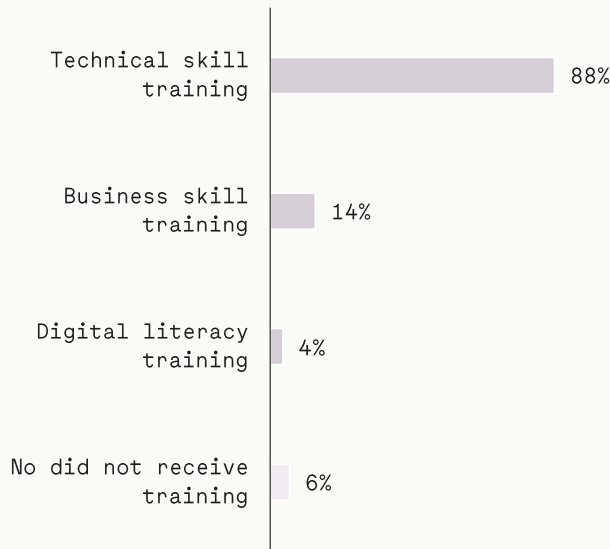

*The sample size includes only those who sold their silk after spinning. 25 spinners who used their silk for weaving are excluded from analysis.

🔊 Experience

A majority (88%) of spinners received technical skill training from Resham Sutra. 6% mention not receiving any form of training.

Type of Training Received

Q: What training did you receive from Resham Sutra?* (n = 192)

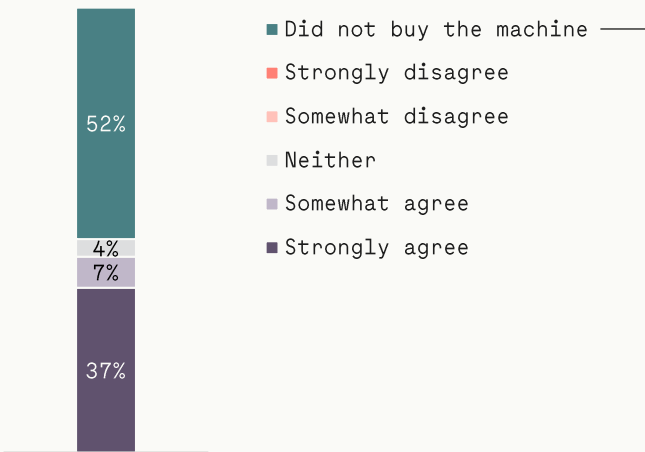

*Asked only to those who selected 'Only training' or 'Both' in types of services accessed from Resham Sutra (see [page 8](#)).

Half the spinners did not buy the machine post-training. They mainly cite financial constraints, delivery delays, and limited time.

Training Influence for Machine Purchase

Q: To what extent do you agree or disagree with the following statement: The training I received influenced my decision to buy the machine. (n = 192).

Reason for Not Purchasing Machine

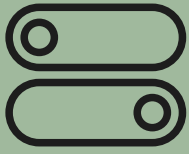

Q: Why did you not [purchase / use] the [spinning machine] from Resham Sutra?** (n = 98)

55%
talk about financial
constrains
(54 spinners)

14%
mention **delivery**
delays
(14 spinners)

14%
report **limited time**
to use machines
(14 spinners)

** Asked to those who selected 'Only training' in types of services accessed from Resham Sutra.

04:

Segmentation Analysis

Not every spinner is the same. Understanding your impact across different groupings of spinners can reveal additional insights into how you can improve performance.

This section disaggregates results by age across five key indicators introduced in previous sections.

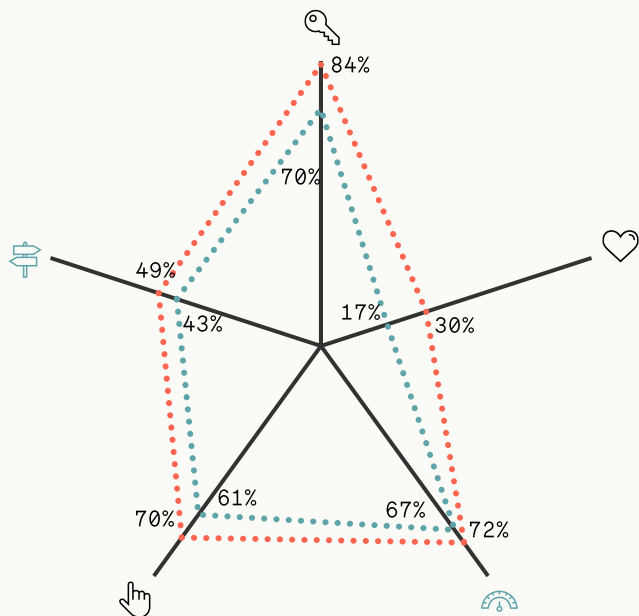

The key indicators in this section are:

- **First Access**
- **Quality of Life**
- **Promoters**
- **Challenges**
- **Ease of Selling Silk**

Segmentation

Younger spinners with Resham Sutra report more positive experiences and greater satisfaction than their older counterparts.

Age Segmentation Analysis

Key

- First access**
% of spinners accessing spinning machine for the first time
- Quality of life**
% of spinners whose lives have significantly improved
- Promoters**
% spinners giving a score of 9 or 10
- Challenges**
% of spinners not experiencing challenges
- Ease of Selling Silk**
% spinners 'strongly agree' that it is easier to sell silk products

Results

- 40 years or younger (n = 57)
- More than 40 years (n = 46)

Insights

1 Younger Resham Sutra spinners experience a greater overall impact than older spinners.
Spinners who are aged 40 years or younger are more likely to access a spinning machine like Resham Sutra for the first time, as compared to those over 40 years old (84% vs 70%). They are also more likely to report a significant improvement in their quality of life than older spinners (30% vs 17%).
This is likely to happen as younger spinners may be more open to adopting new technologies and quicker to integrate them into their work, allowing them to realize the machine's efficiency more rapidly than older spinners.

2 Younger spinners also report higher satisfaction with Resham Sutra.
A greater proportion of spinners aged 40 years or less are Promoters, compared to those aged over 40 years (72% vs 67%). They are also less likely to report facing challenges with Resham Sutra than older spinners (61% vs. 70%).
Moreover, when asked about the sale of silk products, younger spinners are more likely to 'strongly agree' that it is easier to sell their silk products since working with Resham Sutra, compared to older spinners (49% vs 43%). This suggests that younger spinners may find it easier to adopt and leverage the machine's features, enabling them to improve both their workflow and market opportunities more quickly than older spinners.

*Results that are not statistically significant are indicated with a blue icon. Any insights from these metrics are only meant to be directional in nature.

Appendix

Methodology

About the 60 Decibels Methodology

From July – August 2025, 60 Decibels’ trained researchers conducted 201 phone interviews with Resham Sutra spinners. The clients were randomly selected from a random sample of Resham Sutra’s spinner database. For those who purchased the machine from Resham Sutra, we attempted to call the entire database of contacts received. Here is the breakdown of how we collected this data:

Country	India
Client Population	567
Interviews Completed	201
Response Rate	35%
Languages	Assamese, Bodo, Hindi, Khasi
Average Survey Length	16 mins
Confidence Level	90%
Margin of Error	6%

Calculations and Definitions

For those who like to geek out, here’s a summary of some of the calculations we used in this report.

Metric	Calculation
Inclusivity Ratio	The Inclusivity Ratio is a metric developed by 60 Decibels to estimate the degree to which an organization is reaching less well-off clients. It is calculated by taking the average of Company % / Country %, at the \$1.90, \$3.20, and \$5.50 lines for low income and low-middle income countries, or at the \$3.20, \$5.50 and \$8.00 lines for middle income countries. The formula is: $\sum_{x=1}^3 \frac{(\text{Resham Sutra Poverty Line } \$x)}{(\text{India Poverty Line } \$x)} / 3$
Net Promoter Score®	The Net Promoter Score (NPS) is a common gauge of client satisfaction and loyalty. It is measured by asking clients to rate their likelihood to recommend a product/service to a friend or family member on a scale of 0 to 10, where 0 is least likely and 10 is most likely. The NPS is the % of clients rating 9 or 10 out of 10 (‘Promoters’) minus the % of clients rating 0 to 6 out of 10 (‘Detractors’). Those rating 7 or 8 are considered ‘Passives’.

Ideas for How to Use these Results

Here are ideas for ways to engage your team and use these results to fuel discussion and inform decisions.

Review Your Results

- ☐ Review your results and qualitative customer responses. There's a lot of interesting feedback in there!

Engage Your Team

- ☐ Send the report to your team & invite feedback, questions and ideas. Sometimes the best ideas come from unexpected places!
- ☐ Set up a team meeting & discuss what's most important, celebrate the positives, and identify next steps.

Spread The Word

- ☐ Reach a wider audience on social media & show you're invested in your spinners.

Close The Loop

- ☐ We recommend posting on social media/website/blasting an SMS saying a 'thank you to everyone who took part in the recent survey with our research partner 60 Decibels, your feedback is valued, and as a result, we'll be working on XYZ' (edited)
- ☐ If you can, call back the spinners with challenges and/or complaints to find out more and show you care.
- ☐ After reading this report, don't forget to let us know what you thought: [Click Here!](#)

Take Action!

- ☐ Collate ideas from team into an action plan including responsibilities.
- ☐ Keep us updated, we'd love to know what changes you make based on these insights.
- ☐ Set up the next Lean Data project – we recommend checking in again in 6 to 12 months.

About 60 Decibels

60 Decibels is the world's leading customer insights company for social impact. We bring speed and repeatability to social measurement, making it easy to listen directly to the people who matter most. Our network of 1,400+ researchers in 80+ countries gives you global reach. Couple this with standardized questions across thousands of projects and you get the largest data set of social performance benchmarks worldwide — with a focus on Financial Inclusion, Off-Grid Energy, and Agriculture value chains. These data help investors, funders, Fortune 500 companies, and NGOs understand their impact performance relative to their peers. Get in touch to find out more about our award-winning approach to impact measurement.
